

# 150mm Single Wafer Shipper

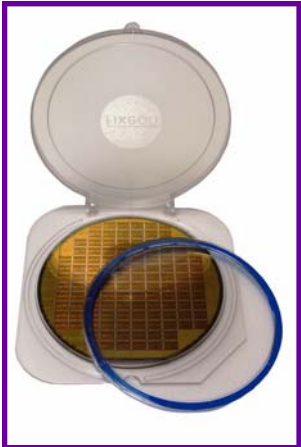

Phoenix™

The **Phoenix™**, a new injection molded 150mm Single Wafer Shipper (SWS) made by Fixeon has incorporated many high performance features, which provide the best wafer protection solution for the industry. Fixeon uses the cleanest low ionic thermoplastic polycarbonate, which also gives customers a durable product with a

longer life cycle. The Phoenix has the lowest profile in the industry, which provides secure stacking with less storage space. Wafers are stabilized with an elastomeric gasket that holds the wafer stationary and internally seals the wafer from potential external contamination.

### Product features include:

- *Low Ionic polycarbonate for strength and cleanliness*
- *Lid and Base options include either clear base with clear lid or ESD base with clear lid*
- *Hinged lens cover with integrated fastener that protects package*
- *Transparent removable lens protects wafer while allowing optical metrology*
- *Integrated proprietary seal minimizes contaminates and securely holds the wafer during handling and shipping*

Patent Applied For

Part Number	Lid & Base Options	Width	Length	Height	Weight
SWS-150-XXX (XXX = Lid Base color)	CLR=Clear Base w/ Clear Lid ESD=ESD Base w/Clear Lid	177mm (7.0")	177mm (7.0")	14mm (0.55")	217g (7.6oz)
