

# Air Cushion Packaging

ACP™

Fixeon's **ACP™** (Air Cushion Package) is made of clear durable multi-layered Nylon/Poly film with integral inflatable bladder pockets for the ultimate in shock protection. This product is reusable and made to replace bulky die cut foam. After using the ACP for shipping, the valve can be opened and deflated and sent back flat to its origin. Most customers find that the reusable ACP product compliments their environmental conservation programs while maintaining an initial lower total cost of ownership when compared to diecut foam and other cushioning materials.
