

# 200mm Horizontal Wafer Shipper

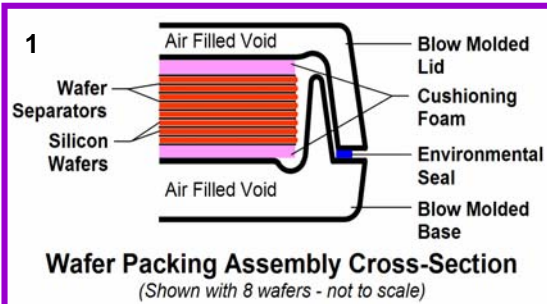

Hawk™

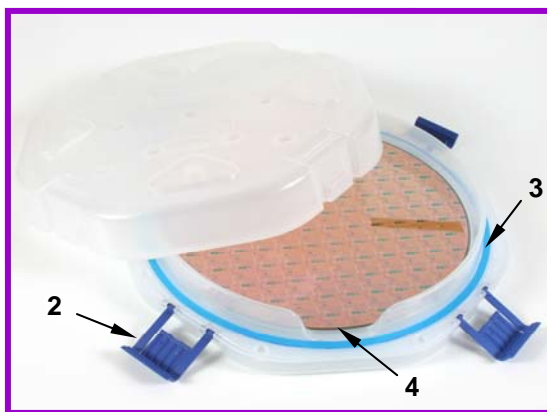

The **Hawk™**, a new blow molded 200mm Horizontal Wafer Shipper (HWS) made by Fixeon has incorporated many high performance features which provide the best protection solution for shipping 2 to 25 wafers in the industry. Fixeon uses the cleanest and most resilient polypropylene co-polymer in our shipper. In

addition to our material, the design lends itself to absorbing shock better than injection molded wafer shippers due to the dual wall, air filled lid and base. The Hawk has a low nest-able profile, which provides secure stacking with less storage space. Wafers are equally suspended by the use of die cut wafer separators and foam cushioning consumables. Fixeon has a diverse variety of consumable protection to meet our customers shipping performance and budget. Additional exterior shock protection can be provided by utilizing the Air Cushion Packaging (ACP).

## Product features include:

- Blow molded dual wall construction <sup>1</sup> in lid and base provides four walls of resilient protection
- Ultra-clean polypropylene co-polymer in ESD black or natural Clear
- Four nylon dual latch fasteners <sup>2</sup> securely lock the lid to the base
- Optional environment seal <sup>3</sup> protects wafers from contamination and moisture
- Wide access slots <sup>4</sup> in base for manual or automated wafer insertion and removal
- Non contact and other customized solutions available for applications such as MEMS

Part Number	Material Type	Seal Type	Width	Length	Height	Weight
HWS-200-XXX (XXX = Lid Mat'l, Base Mat'l, Seal)	CL = Clear, ES = ESD	S = Seal, N = No Seal	244mm (9.60")	244mm (14.15")	70mm (2.75")	0.54kg (1.2 lbs)
